**About Benco Dental**

Who is Benco Dental? Benco Dental, the largest privately owned, full-service dental distributor in the United States, has remained in the family since 1930—a family that includes our more than 30,000 customers in 40 states. At Benco Dental, it's our mission to deliver success smile after smile. We provide more supply and equipment options than any other full-service distributor, an offering enhanced by a comprehensive suite of services, including office design, equipment repair, practice coaching, financing and real estate planning, wealth management and dental-specific technology solutions. These services are supported by over 340 professionally trained sales representatives and 265 factory-trained service technicians. Put it all together, and Benco Dental offers all the tools to enable dental professionals to achieve their desired goals for success.

But where does success begin? During Benco Dental's 80-year history, the company has grown

from a single storefront location in Wilkes-Barre, PA into the nation's fastest-growing dental distributor with 50 regional showroom locations and four distribution centers. In 2010, Benco Dental opened North America's largest dental equipment showroom as part of a new corporate headquarters. CenterPoint, the 272,000-square foot headquarters and distribution center, is home to 25 fully functional operatories and 14 operational digital X-ray units, complemented by a design concept suite, specialty displays, a handpiece cutting exhibit, sterilization models, and a state-of-the-art training and technology center. CenterPoint is the only place where dentists can come to test drive equipment prior to a purchase. Thanks to a fully automated warehouse, with over two miles of conveyor, upgraded phone and computer systems, a world-class education center and environmentally friendly heating and lighting, CenterPoint offers an experience unrivaled in the dental industry.
