Since her father founded the company more than eighty years ago, the company and the brand KOMET have become established names in the dental sector, standing for competence, excellent quality and innovative products. Deeply committed to the success of KOMET, the Niehus family has maintained strong ties with the company to this very day. Aware of their social and corporate responsibility, Corporate Partner Clair Niehus and her daughters attach great importance to the vocational training of our staff, investment in modern buildings and production plants and to the close dialogue with customers and business partners.

" Today we are the leading supplier of innovative products, and our customers can choose from one of the world's largest ranges of rotary instruments and dental systems.

We are proud to be one of the few successful family businesses in the dental sector. Thanks to lean management and high decision-making power on all levels, we remain open to future challenges while maintaining the independence of our company.

To us, tradition means both commitment and the perspective to meet all future challenges."

Clair Niehus Corporate Partner
